FEATURES

Goldenfert is a compound granular Chlorine free NPK fertilizer based on potassium sulphate. It contains Magnesium Sulphur and trace elements.

Goldenfert is based on particular and carefully selected raw materials resulting in a high value product with excellent field results.

The phosphate, derived from SSP, is 90% soluble in water. All magnesium is 100% water soluble. Due to the premium ingredients and balanced ratios, the product is suitable for a wide range of horticultural and agricultural crops. Boron and Zinc, two important trace elements complete the product. **Goldenfert** is available in yellow or blue coloured granules.
